OBJECTIVE

To be a part of an organization where I can fully utilize my skills in programming languages to make a significant contribution to the success of the employer, while at the same time pursuing my individual growth.

PROJECTS

Project Title: Gas leakage detector using GSM & Arduino

Project Overview:

- The project aimed to create an efficient and reliable system for detecting gas leaks and sending real-time alerts to users via SMS.

Key Contributions:

- I conducted extensive research on gas leakage detection methods and GSM technology, which informed the design and construction of a prototype gas cylinder leakage detection system using an Arduino Uno board.
- By integrating gas sensors into the system, I successfully enabled the detection of gas leaks from cylinders.
- To establish communication between the system and users' mobile phones, I utilized a GSM module.

PERSONAL TRAINING

Participated in short term training on "Internet of things by using Arduino"

ACADEMIC DETAILS

B Tech/B.E. - 8.1 /10.00

Electronic & Telecommunication

Trident Academy of Technology
(Biju Patnaik University of Technology)

(2022)

Inter - 93%

Sri Chaitanya junior college (state Board)

(2018)

School (10th) - 45%

Andhra Higher Secondary School (State Board)
